
Scientific Community Hagstrom Warren O New

hagstrom wo. the scientific community. new york: basic ... - title: hagstrom wo. the scientific community. new york: basic books. 1965, 304p. (university of wisconsin, madison, wi) subject: citation classic commentary: hagstrom wo "in at the ground floor? **14 chapter two: the differences between science and ...** - autonomy, the scientific community is the only society capable to further embellish their appendix. hagstrom, the scientific community, 9. hagstrom makes the interesting point that various antirationalist philosophers such as nietzsche viewed the cultivation of "disinterestedness" as a form of psychopathology. **the capacity of a scientific community: a study of the ...** - travel and tourism research association as an instance of such a community. the research reports on community perceptions of the association in the capacity building of the membership community. results of the study are discussed in the contexts of science communication, knowledge networks, and scientific community capacity and have practical **the scientist: secretive, selfish or reticent? a social ...** - knowledge was tested and replicated in a community. (hagstrom, 1965) fundamental to the functioning of science is the open sharing of knowledge. (birnholtz and bietz, 2003) one idealized potential of grid technologies is that they allow for the efficient, and effective, **social control in applied social science: a study of ...** - the scientific community. such control reinforces and complements the socialization process in science. . . . importantly, for our purposes, hagstrom finds evidence to suggest that there is substantial variation in the degree to which scientists conform to **scientific innovation, philosophy, and public policy** - hagstrom concludes with the observation that "[s]cientific knowledge is community property. discoverers have limited rights, but among them are rights to be recognized for their discoveries." thus, we can summarize hagstrom's findings by saying that he found certain proprietary impulses at work beneath the surface of the otherwise mertonian world **social influences and scientists** - book reviews social influences and scientists alan t. waterman the author, warren o. hagstrom, has undertaken the research for this book, the scientific community (basic books, new york, 1965. 320 pp., \$5.50), as a contribution to the study of the behavior of scientists. **patents and the progress of science: exclusive rights and ...** - ren o. hagstrom, the scientific community 108-9 (basic books, 1965); william kornhauser, scientists in industry: conflict and accommodation 16-17 (u cal, 1963). the operation of the patent laws has traditionally been confined to applied research. see rebecca s. **justifying patents: a critique of the deontological approach** - scientific information. merton (1942) is known for characterising science as 'communitistic', in the sense that the findings of science are a product of social collaboration and thus owned jointly by the community. hagstrom claimed that "scientific knowledge is [seen as] community property" (1965, p99). **cong cao sars: "waterloo" of chinese science** - scientific prowess to the international community — authoritative and institutional structures, scientists from different jurisdictions not collaborating, etc. — and concludes that nothing has since changed. the outbreak of an epidemic involves scientific, medical and public health issues. from a purely scientific research perspective, it ... **document resume ed 131 080 - eric** - reading such sociology of science books as the scientific community by warren o. hagstrom (new york: basic books, 1965) and bernard barber and walter hirsch's in the sociology of science (new york: free press, 1962), which included some of robert merton's writings. dershimer raised some **scientific communities or transepistemic arenas of ...** - the scientific community as a unit of contextual organization ... hagstrom (1965), who grounds the normative functional behaviour of scientists in a mechanism by which creative, scientific achievements are exchanges for a variety of rewards specific to the system. this mechanism of exchange is linked to the idea of gift- **by jorge pÉrez-gallego - university of florida** - in an enduring community of science, scientific knowledge may circulate either as a commodity, for sale at a profit, or a gift. sociologist warren hagstrom points out that manuscripts submitted to scientific journals are often called contributions, and they are, in fact, gifts. 3 it is rare for the journals that print these contributions **adaptive interactions in societies of agents - aaai** - the effects of coding, priming and training are basic phenomena in any learning system. now that the aspirations of the 60s are beginning to be filled by the intelligent adaptive agents of the **chapter ii changing objectives of accounting** - the norms of the scientific community. 3 by recognition, hagstrom meant "the written and verbal behavior and the 'expressive gestures' of scientists that indicate their approval and esteem of a colleague because of his research accomplishments. 4 hagstrom drew some **science and industry : a theory of networks and paradigms** - community'alsoferredtoasthe'r8cdcommunity.'thiscommunityconsists of the scientists and engineers who are workingtowards thesolutionof an interrelated problem-set, who are dispersed across both private and public sector **social and cognitive processes in knowledge acquisition** - knowledge acquisition in the scientific community (hagstrom 1965). merton (1973) coined the term the "matthew effect" for those features of the reward system in research that were biased towards allocating greater credit for the same discovery to those with an already established reputation. **4. the lineage and limits of science as community in sts** - the idea of scientific community may have had its genesis in the work of ludwig fleck,⁸¹ but in the anglo-american world it has come to science studies primarily by way of merton and kuhn. since then it has been amended and reinforced by hagstrom in the 60's, critiqued and amended by **facilitating scientific research: intellectual property ...** - facilitating scientific research: intellectual property rights and the norms of

science—a response to rai and eisenberg f. scott kieff* i. introduction arti rai's article in the fall 1999 issue of the northwestern university law review explores the proper use of both legal rules and prescriptive

scientometrics: the project for a science of science ... - explicit the mechanisms of social recognition in the scientific community. for instance, eugene garfield, the founder of the institute for scientific information (isi), usually claimed that “a lot of people are passed over in the informal reward system of science... citation analysis became for me a vehicle to transform an informal system of ... **knowledge networks a social network analysis of ...** - from a scientific community perspective, the growth of a field calls for periodic monitoring of its knowledge created by and/or diffused in its scientific community (ben-david, 1964; crane, 1972; hagstrom, 1964, 1965). as such, the scrutiny of research topics or subjects is central to the state-of-art analysis in a field. **tales of emergence—synthetic biology as a scientific ...** - the way in which a potential scientific discipline emerges needs to maintain a sense of place, as evolving structures depend on local and national contingencies (collins and pontikakis, 2006). the emergence of a community of practices is not a global process (even though it can be made to become a global process). **kai manne börje siegbahn - physicist today** - scientific community came with the ... stig b. hagstrom stanford university stanford, california albert vinicio baez albert vinicio baez, a pioneer in x-ray optics and codeveloper of the x-ray reflection microscope, died of natural causes on 20 march 2007 in redwood city, california. in addition to being a **the legacy of a minnesota education** - hagstrom's book, the scientific community, was published in 1965, but unfortunately too late to inform my dissertation. nevertheless, ed gross's thoughtful questions about the profession of sociology were prescient. talcott parsons had just initiated a new journal, the american **climate science, character, and the “hard-won” consensus** - ranalli • climate science, character, and the “hard-won” consensus [183] kennedy institute of ethics journal vol. 22, ... warren hagstrom [1965], and norman w. storer [1966]) varied the list somewhat, but canonically there are four ... scientific community at large) to question any and all dogma. **scientists at major and minor universities--mobility along ...** - studies by hargens and hagstrom (196^) and cole (1973), find that an individual's accomplishments are equally as important as one's academic background in securing a prestigious academic appointment (1965 and 1970) and long (1978) find **departmental effects on scientific productivity** - departmental effects on scientific productivity author(s): paul d. allison and j. scott long ... scholarly community to preserve their work and the materials they rely upon, and to build a common research platform that ... hagstrom for the use of his data. this paper was presented at the annual meeting of the american sociological association ... **the visible colleges of management and organization ...** - natural sciences to substantiate his model of scientific development (kuhn, 1970). accordingly, whether kuhn's account in general and his concept of scientific community in particular are adequate for empirical research in and conceptually transferable to the social sciences has been a major source of criticism. **dna repair: a spatially rooted analysis of the development ...** - world scale scientific groups. moreover, warren hagstrom in its seminal work on the scientific community has shown that a way to avoid concurrence in a new field is to disperse specialists in different laboratories at the national scale (hagstrom 1965). in so doing, the research area has more chance to spread and become a recognized specialty. **what is originality in the humanities and the social sciences?** - what is originality in the humanities and the social sciences? author(s): joshua guetzkow, michèle lamont, grégoire mallard ... come by a scientific community, which is con- ... humanities and the social sciences. in inter- views, we found that panelists described origi- nality, for example, in terms of the novelty of ... **team size matters: collaboration and scientific impact ...** - team size matters: collaboration and scientific impact since 1900 vincent larivière 1,2, cassidy r. sugimoto 3, andrew tsou , and yves gingras 2 1.
